Full stack QA Engineer

Experiența profesională

Full stack QA engineer · Luxoft
Octombrie 2023 - Prezent · 1 an 2 luni

As an integral part of the Mercedes automotive project at Luxoft, I specialize in ensuring the quality and reliability of software-defined vehicles. My role revolves around testing OTA updates, a critical aspect of modern automotive systems. Here are the key highlights of my responsibilities:

- I adhere to strict quality standards, ensuring that OTA updates meet safety, security, and functional requirements.

- I create and customize scripts to facilitate efficient OTA testing.

- Manage and support networking infrastructure utilizing Ubiquiti UniFi Controller, ensuring optimal performance and stability.

- Administrate and maintain Debian/Ubuntu-based Linux servers, overseeing system updates, security patches, and overall server health.

- Working in Proxmox hypervisor, including configuration and management of high availability (HA) clusters, CEPH storage, and virtual machines/CT.

- Experienced in container orchestration using Docker Swarm, ensuring seamless deployment and scaling of services.

- Collect and analyze system metrics from Raspberry Pi devices, integrating data into InfluxDB and designing comprehensive dashboards in Grafana for real-time monitoring.

QA Specialist · Stefanini EMEA
Martie 2018 - Noiembrie 2023 · 5 ani 9 luni

As a Retail Software Testing Specialist, I contributed significantly to ensuring the quality and reliability of software applications within the retail domain. Here are my key responsibilities:

- Created and executed comprehensive software test suites, meticulously identifying and documenting software issues and their root causes.

- Developed and modified automation scripts using Bash and Ant, streamlining testing processes.

- Analyzed client business requirements and processes through document analysis, workshops, and workflow assessments.

- Ensured alignment between business requirements and functional/technical specifications.

- Conducted various types of testing, including validation of new

software features and regression testing.

- Focused on maintaining software integrity and functionality.

- Collaborated on improving and fixing project features written in Bash and Ant scripts.

- Leveraged Postman, Newman, and JavaScript to migrate manual testing efforts into automated API testing.

Senior Software Tester · Orange

As a dedicated Telecom Software Testing Specialist, I contributed significantly to ensuring the quality and reliability of telecommunications systems. Here are my key responsibilities:

- Conducted thorough testing of new software features, ensuring their functionality across various levels.

- Performed regression testing to validate system stability after code changes.

- Evaluated software performance to optimize network resources.

- Developed comprehensive test cases based on requirements provided by analysts. These test cases were essential for validating system behavior.

- Worked closely with developers and other team members during testing requirements and release planning.

- Ensured seamless communication between development and testing phases.

- Verified fixes by executing defined test scenarios and test cases.

- Focused on every stage of testing, from writing initial test cases to final validation.

QA Test Analyst · Code Factory Ltd
Aprilie 2016 - Aprilie 2017 · 1 an 1 lună

- Conducted thorough functional testing to ensure software features aligned with requirements.

- Collaborated with Business Analysts to gather and review Business Requirement Documents and Technical Specifications.

- Developed and executed comprehensive test cases and test suites.

- Validated data integrity using SQL queries.

- Worked closely with business stakeholders and developers during bug triage, ensuring timely resolution and closure of issues.

- Performed manual black box testing to identify defects.

- Identified software defects and submitted problem reports via Quality Control (QC) processes.
