Senior Frontend Developer

Despre mine

Experienced Angular developer with over a decade of expertise in crafting dynamic web applications. Skilled in cross-functional collaboration to deliver elegant, scalable solutions. Passionate about innovation and enhancing user experiences.

Experiența profesională

Senior Frontend Developer · Infowatch · Moscow

Martie 2013 - Prezent · 12 ani

Development and maintenance of an enterprise-level product using Angular, ensured scalability and robustness to meet the demands of large-scale business operations

Achieved 80% code coverage rate through comprehensive testing and debugging, ensuring high-quality, bug-free software releases for enterprise clients.

Implemented a microfrontend architecture for the purpose of merging different company projects into a new one, breaking down the monolithic frontend into modular, independently deployable components. This strategic shift significantly enhanced code maintainability.

Led the creation of a reusable component library, streamlining frontend development processes and ensuring design consistency throughout the company's web applications.

Led a team in developing a Figma design system and implementing automated processes for seamlessly translating design system elements into real project assets.

Implemented a suite of tools for designers, including an automatic backup system for Figma files and the assembly of Storybook, ensuring alignment with the latest design system updates.

Engineered reusable chart components utilizing D3.js across diverse projects.

Web Developer · Dudu communications

Iunie 2011 - Ianuarie 2013 · 1 an 8 luni

Collaborated with UX/UI designers to transform wireframes and mockups into pixel-perfect web pages, ensuring a seamless user experience.

Maintained and updated existing web application, ensuring cross-browser compatibility and compliance with web standards(W3C).
