## Contabil junior (En)

### About me

I am a creative person, who comes from the field of Art, because since childhood I attended painting and music. I attended music school, where I learned piano, solfeggio, music literature, obtaining a graduation diploma. I also like to paint portraits in pencil, contributing to my portfolio as a beginner artist.

Having a family business, I was guided in the field of economics, especially accounting, namely the basic work which is the arrangement of documents by month, the registration of fiscal facts in 1C, and not only. I am studying at ASEM-license, 2nd year and I am able to start putting into practice what I have assimilated over the years. Now the priority for me is to get a job, because this way I will combine theory with practice. I chose this field, because I feel that our country needs a new generation to stabilize inflation, unemployment and corruption. That's why I'm ready for new opportunities to learn and make a better society, in a successful command.
