# Senior Java Developer

## Work experience

### Senior Java Developer · Software Mind

February 2023 - July 2024 · 1 year 5 months

- Implemented new service and new features, ensuring they meet the specified requirements
- Developed and maintained clean, efficient, and maintainable code
- Participated in code reviews to ensure code quality and consistency
- Used debugging tools and techniques to find the root cause of issues and implemented proper fixes, ensuring issues are resolved without introducing new bugs
- Collaborated and worked closely with the team, including other cross-functional teams, such as front-end developers, QA engineers, product managers
- Participated in daily stand-ups, sprint planning, and retrospective meetings
- Wrote unit, integration and end-to-end tests for new and existing code to ensure functionality and quality

Skills: Java (Programming Language), Spring Framework, Spring WebFlux, Lagom Framework, Sbt (Software), Apache Kafka, WebSocket, Project Reactor, Amazon Web Services, PostgreSQL, Flyway, Spring Cloud Gateway, Spring Actuator, Clean Code Principles, Software Debugging, Code Review, Agile Methodology, Team Working, Unit Testing, Integration Tests

### Java Developer · CytoByte

February 2022 - November 2022 · 10 months

- Worked on bug fixing, alongside few new features and functionality in the software as per the project requirements
- Participated in code reviews, ensuring adherence to coding standards and best practices
- Maintained database schemas, queries, and procedures
- Integrated third-party APIs and services with the platform
- Wrote and maintained unit tests to ensure code quality and stability

Skills: Java (Programming Language), Kotlin, Apache Kafka, Spring Framework, Spring-boot, PostgreSQL, Java Persistence API, Hibernate (Java), Gradle, Lombok, Okta

## TOP Skills

- **Spring Framework** · 7 years
- **Java (Programming Language)** · 7 years
- **Apache Maven** · 5 years
- **PostgreSQL** · 4 years
- **Apache Kafka** · 4 years
- **Hibernate (Java)** · 3 years

## Preferences

- Full-time
- In-house
- Hybrid

## Languages

- **Romanian** · Native
- **Russian** · Communication
- **English** · Fluent

## Driving licence

Category: A, B

With personal auto

## **Java Developer** · Kivork

*August 2021 - April 2022 · 9 months*

- Bug fixing, implemented new features based on the project requirements, ensuring that code is well-documented and easily understandable
- Ensured that the code adheres to security and performance standards, through code reviews and quality assurance
- Communicated effectively to ensure alignment on project goals and timelines
- Used tools like Jenkins and Docker, for deployment automation
- Wrote and maintained unit tests to ensure code quality and stability

**Skills:** Java (Programming Language), Spring Framework, Spring-boot, Oracle Databases, Java Persistence API, Hibernate (Java), Apache Maven, Log4j

## **Java Developer** · Inther Software Development

*September 2020 - July 2021 · 10 months*

- Wrote, tested, and maintained Java code for the application, ensuring high performance and reliability
- Implemented new features and functionality in the software as per the project requirements
- Participated in code reviews, ensuring adherence to coding standards and best practices
- Identified, troubleshooted, and fixed bugs and issues in the existing codebase
- Designed, developed, and maintained database schemas and queries
- Optimized the performance of the application, ensuring fast and efficient processing of transactions and code
- Maintained technical documentation for reference and reporting
- Wrote and maintained unit and integration tests, to ensure code quality and stability
- Participated in daily stand-ups, sprint planning, and retrospective meetings

**Skills:** Java (Programming Language), Spring Framework, Oracle Databases, Javasever Pages, ReactJS, Hibernate (Java), Apache Maven, SonarQube, Log4j

## **Java Developer** · Stefanini

*July 2018 - August 2020 · 2 years 2 months*

- Participated in technical discussions about designing and architecting the software, where it was ensured that the architecture meets both current and future business needs and scalability requirements
- Implemented complex features and components
- Maintained high standards for code quality, performance, and scalability with the help of the team lead and other teammates
- Utilized best practices for testing, code reviews, and documentation

- Developed core application modules, optimized database queries, and ensured efficient memory usage
- Participated in meetings with project managers and product owners to define project requirements, scope, and schedules
- Experimented with new technologies, frameworks, and methodologies
- Implemented improvements in coding practices, tools, and processes
- Provided status updates, and explained technical concepts to non-technical people
- Analyzed system performance, identified bottlenecks, implemented optimizations and ensured efficient scaling in collaboration with the team

**Skills:** Java (Programming Language), Spring Framework, Spring Data, Apache Kafka, Extensible Stylesheet Language (XSL), PostgreSQL, MongoDB, XML, Apache Maven, Ant

### **Java Developer** · Code Factory (Software Mind)

*November 2016 - July 2018 · 1 year 8 months*

- Worked on bug fixing, alongside few new features and functionality in the software as per the project requirements
- Optimized the performance of the application, ensuring fast and efficient processing of transactions, processes and other code
- Used debugging tools and techniques to find the root cause of issues and implemented proper fixes, ensuring issues are resolved without introducing new bugs
- Maintained database schemas, queries, and procedures
- Participated in daily stand-ups, sprint planning, and retrospective meetings
- Participated in code reviews
- Wrote clean, efficient, and maintainable Java code
- Followed best practices and coding standards based on team lead's mentorship and support
- Wrote unit and integration tests for the existing codebase
- Monitored application performance
- Optimized code and database queries for better performance
- Participated in daily stand-ups, sprint planning and other meetings to clarify business logic questions
- Checked latest Java technologies, frameworks, and industry trends

**Skills:** Java (Programming Language), Java Platform Enterprise Edition (J2EE), Hibernate (Java), MySQL, XML, Spring Framework, Apache Maven, Ant, JavaScript (Programming Language), JQuery, Ajax (Programming Language), Javasever Pages, Apache Struts

### **Python Developer** · Code Factory (Software Mind)

*February 2017 - April 2017 · 3 months*

- Studied technical documentations and implemented a new payment provider into an existing service and new features, ensuring it meets the specified requirements

-Ensured that the integration is secure, reliable, and performs well  
-Handled data transformation and validation between the systems  
-Participated in meetings and debugging sessions with the team leader and the developers of the payment service, to find and fix discrepancies between implemented code and the provided documentation  
-Wrote technical documentation for the new integration  
-Participated in testing sessions of the new integration and deploying it

Skills: Python (Programming Language), Django Web Framework, JQuery, Ajax (Programming Language), Backbone.js, PostgreSQL, Redis, Nginx

## **Desired industry**

- IT, Tech

## **Education: Higher**

### **Moldova State University**

*Graduated in: 2017*

Faculty: Computer Science

Speciality: Applied Computer Science
